The automatic folding machine **FX23** folds clothes quickly, quietly and precisely. It functions independently and requires 1 operator.

It is designed to fold t-shirts, sweatshirts, sweaters, undershirts, etc.

It can be very easily adjusted for the various sizes and types of clothes so that the best desired folding is achieved.

FX23, apart from the automatic folding, offers another two important options after the cloth has been folded.

The first option is a program for stacking and easy gathering of the folded clothes.

The second option is a program for easy packaging of the cloth in a bag.
